Acknowledgments	i
1 The Information Economy	1
Information	2
The cost of producing information	3
Managing intellectual property	3
Information as an experience good	4
The economics of attention	5
Technology	6
Systems competition	7
Lock-in and switching costs	8
Positive feedback, network externalities, and standards	10
Policy	13
How we differ	13
2 Pricing Information	15
Cost of producing information	16
Costs and competition	17
When information is commoditized	18
Market structures for information goods	19
Differentiate your product	20
Cost leadership	21
First-mover advantages	22
Personalize your product	24
Know your customer	25
Registration and billing	26
Queries and clickstream	27
Pricing your product	29

Personalized pricing	30
Personalized pricing in traditional industries	31
Personalized pricing on the Internet	32
Lessons about personalized pricing	33
Group pricing	33
Price sensitivity	34
Network effects	34
Lock-in	35
Sharing	36
The Electric Library	37
Lessons	38
3 Versioning Information	39
Designing your product line	41
Delay	41
User interface	42
Convenience	42
Image resolution	42
Speed of operation	43
Flexibility of use	43
Capability	43
Features and functions	44
Comprehensiveness	44
Annoyance	44
Support	45
A numerical example	46
Value-subtracted versions	47
Avoiding pitfalls in versioning	48
On-line and off-line versions	49
How many versions?	50
Analyze your market	51
Analyze your product	51
Goldilocks pricing	53
Customizing the browser	54
Bundling	55
Dispersion in customer value	56
Other reasons for bundling	57
Information bundles	58
Customized bundles	58
Promotional pricing	59
Lessons	60

4 Rights Management	63
Production and distribution costs	64
Making lower distribution costs work for you	64
Giving away your content	65
Demand for repeat views	66
Similar but not identical products	68
Selling complementary products	69
Illicit copying	70
Making lower reproduction costs work for you	70
Digital Audio Tape	71
Trusted systems	72
Cryptolopes and superdistribution	73
Problems with cryptographic envelopes	74
Historical examples	76
The rise of the library	76
The rise of the video	77
Growing the market	78
Choosing terms and conditions	79
The analytics of rights management	79
Transactions costs	81
Lessons	82
5 Recognizing Lock-In	83
Examples of lock-in	84
Bell Atlantic	84
Computer Associates	85
Aircraft repair and cargo conversion	86
Small switching costs matter	87
Switching costs are ubiquitous	89
Valuing an installed base of customers	89
Classification of lock-in	93
Contractual commitments	94
Durable purchases	94
Brand-specific training	96
Information and databases	97
Specialized suppliers	98
Search costs	100
Loyalty programs	101
Suppliers and partners face lock-in, too	103
The lock-in cycle	104
Lessons	105

6	Managing Lock-In	107
	Lock-in strategy for buyers	108
	Bargaining before you become locked-in	108
	Keeping your options open	110
	Summary of lock-in strategy for buyers	111
	Lock-in strategy for sellers	112
	Investing in an installed base	112
	Look ahead at the whole lock-in cycle	113
	Fighting for new customers	114
	Structuring the life-cycle deal	115
	High market shares don't imply high switching costs	117
	Attracting buyers with high switching costs	119
	Selling to influential customers	120
	Multi-player strategies	121
	Encouraging customer entrenchment	122
	Entrenchment by design	122
	Loyalty programs and cumulative discounts	123
	Leveraging your installed base	124
	Selling complementary products	124
	Selling access to your installed base	127
	Differential prices and lock-in	127
	Attempts to raise search costs	130
	Exploiting a first-mover advantage	131
	Cycle length	132
	Lessons	133
7	Networks and Positive Feedback	135
	Positive feedback	137
	Demand-side economies of scale	139
	Network externalities	142
	Collective Switching Costs	143
	Is your industry subject to positive feedback?	145
	Information products get pushy	147
	Igniting positive feedback: performance vs. compatibility	148
	Evolution: offer a migration path	149
	Technical obstacles	150
	Legal obstacles	151
	Revolution: offer compelling performance	152
	Igniting positive feedback: openness vs. control	153
	Openness	155
	Control	157
	Generic strategies in network markets	158
	Performance Play	158
	Controlled Migration	159
	Open Migration	159
	Discontinuity	160

Historical examples of positive feedback	160
Railroad gauges	161
Battle of the systems: AC vs. DC power	163
Telephone networks and interconnection	164
Color television	165
High-definition television	168
Lessons	172
8 Cooperation and Compatibility	175
How standards change the game	176
Expanded network externalities	176
Reduced uncertainty	177
Reduced consumer lock-in	177
Competition for the market vs. competition in the market	177
Competition on price vs. features	178
Competition to offer proprietary extensions	178
Component vs. systems competition	179
Who wins and who loses from standards?	179
Consumers	179
Complementors	180
Incumbents	181
Innovators	181
Formal standard setting	182
The ITU, ISO, and ANSI	183
The IETF and the W3 coalition	184
Tactics in formal standard-setting	185
Building alliances	187
Assembling allies	188
Interconnection among allies	190
Negotiating a truce	192
Alliances in action	195
Managing open standards	197
Lessons	199
9 Waging a Standards War	201
Classification of standards wars	202
Information-age standards wars	202
AM stereo radio	203
Digital wireless telephones	203
56k modems	205
Key assets in network markets	207
Two basic tactics in standards wars	209
Preemption	209
Expectations management	211
Once you've won	212
Staying on your guard	212

Commoditize complementary products	214
Competing against your own installed base	214
Protecting your position	215
Leveraging your installed base	216
Staying a leader	217
Rear-guard actions	218
Adapters and interconnection	218
Survival pricing	220
Legal approaches	221
Capstone case: Microsoft vs. Netscape	221
Preemption	222
Penetration pricing	223
Expectations management	225
Alliances	225
Lessons	225
10 Information Policy	227
Policy overview	228
Price differentiation	229
How differential pricing can benefit consumers	230
Competition policy	232
Principles of competition policy	232
Implications for strategy	233
Mergers and joint ventures	235
Cooperative standard setting	235
Single-firm conduct	238
Direct government intervention	239
Government regulation	239
The government's role in achieving critical mass	241
Universal service	242
Lessons	243
Further Reading	245
The Information Economy	245
Pricing Information	245
Versioning Information	246
Rights Management	246
Recognizing Lock-In	246
Managing Lock-In	247
Networks and Positive Feedback	247
Cooperation and Compatibility	247
Waging a Standards War	248
Information Policy	248
